

**50  
m<sup>2</sup>****WILD GAME REPELLER****OUTDOOR****CHASES AWAY WILD GAME**

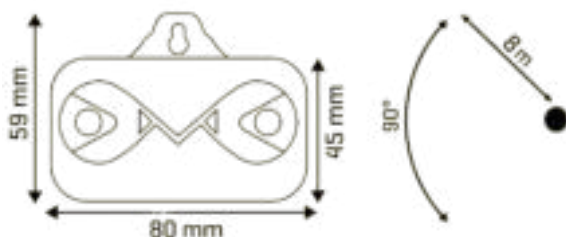

Deers, hares, wild boars from your garden, vegetable patch, chicken coop.

The device repels game, deer, hares and wild boars. It emits red light flashes that they mistake for fire and predatory eyes. Wild animals are frightened by fire, when they detect it, they run away.

- Protects a maximum area of 50 m<sup>2</sup>
- Power supply: photovoltaic panel with rechargeable Ni-MH battery, 1.2 V DC, 800 mAh, charging time 6 hours, battery life for several days
- Maximum power consumption: 1.8 watts.
- Dimensions : 80 x 45 x 59 mm.
- Waterproof IP44.

The device emits up to 8 meters at an angle of 90°, it thus protects an area of up to 50 m<sup>2</sup> such as the garden, vegetable patch, chicken coop...

**INSTALLATION AND SETTINGS:**

Choose a mount to fix the device. Fix the device at height according to the targeted game:

Owl and hawk: 2.5 meters

Roe deer: 1.2 meter

Big animal: 0.5 meter

Small animal: 0.3 meter

Press the ON/OFF button, located on the back of the device, to turn it on. It then emits intermittent flashes of red light, more or less rapid and for random durations of 5 to 15 seconds to increase the scaring effect.

To protect a large area, or if the foliage in the area to be protected is dense, several devices may be necessary.
