aphids, midges, fruit flies,
white flies and whitefly

Potted Plant Glue Traps control unwanted insects that colonize potted plants. The light spectrum of its bright yellow color attracts pests which stick as soon as they come into contact with the sticky surface of the trap. Prisoners, they die quickly. Effective up to 2 to 3 months per trap, depending on the dust and the frequency of watering, they are disposable as soon as they are full.

- are planted in the ground or attached to the pot or wall thanks to the adhesive located on the back of the trap
- Pests are attracted to the color yellow

INSTRUCTIONS OF USE

- 1 - Open the box and take the trap out of the bag.
- 2 - Plant the trap directly in the pot or stick the trap on the pot or the wall after removing the cover protecting the adhesive located on the back of the trap.
- 3 - Remove the cover protecting the sticky surface of the trap.
- 4 - Throw the trap when it is full.

ADVICE

Pests are attracted by the bright yellow color of the trap, place the trap to make the sticky surface as accessible as possible. In case of direct contact with glue, rub gently with vegetable oil and then wash with soap and water.
